

2-Port DisplayPort USB Cable KVM Switch w/Audio, Mic and Hub

UDP-TA2

Reduce Cabling Hassles! Compact and concise KVM switch for an instant switching

The UDP-TA2 is a 2-port DisplayPort USB KVM Switch with 2 sets of USB KVM & Audio/Mic combo cables and a wired QuickSwitch button for easy connection to your two computers. It allows you to access, control, boot and reboot two USB-enabled multimedia computers with only one USB keyboard, mouse, display and a speaker set and microphone. For easy and fast switching between two computers, you can use the QuickSwitch button or the Switching Software Client installed on your PCs!

QuickSwitch button for instant switching operation

The QuickSwitch button can be conveniently placed near your hand on the desktop. Whenever you need to switch computer channel, you can press it lightly for instant switching to the other computer. Besides the QuickSwitch button, you can also use the software switching utility.

Switching Software Support for PC and Mac

The UDP-TA2 with both Windows and Mac version of the Switching Software utility program can be installed on the connected computers for operating further functions of KVM. The Switching Software can be on your system tray of desktop as an easy evoked icon.

USB 2.0 hub ports compliant for USB keyboard, mouse and high-speed device sharing

The USB 2.0 interface offers multi-platform support for PC and Macintosh. The two USB 2.0 keyboard and mouse ports are actually transparent USB hub ports that feature a full driver support for advanced keyboard/mouse functionalities. In addition to the usual connections of a set of USB keyboard and mouse, the two USB 2.0 keyboard & mouse ports can also be connected to high-speed USB devices such as USB disk storage or webcam, etc.

Less cabling Hassles for KVM users

The UDP-TA2 with 2 sets of USB KVM & Audio/Mic combo cables is easy to connect to your computers. You do not have to worry about finding suitable cables for connection.
